Integrating the first of Equations 3. The geometric growth and the stable age structure can be seen. The following points should be noted.

The model may be criticised for taking a rather arbitrary form for f , but it is simple and elegant. The Ford Awards Merten M. Topologies and uniformities by I. The author exemplifies interdisciplinary approaches. It is partly these low R values, and the consequent low level of coverage required, that is often where we learn most from a mathematical model.
