The center should serve as the major communications link between the on-scene incident commander and plant or corporate management as well as with local community officials.

Understanding the current line-up and changes to the line-up is one aspect of continuity of operations.

In order for outreach activities to be executed dependably across a company, these components are listed on a data tabulation sheet and individually analyzed for the following: Potential mode of failure, i. At each handling or processing step, "what if" questions are formulated and answered, to evaluate the effects of component failures or procedural errors on the process. Standardized communication ensures a team is precise in communication and likely. The procedures governing worker activities and interactions must be documented, workers must be trained, and their performance must be monitored on an ongoing basis.
