That's funny. It is a notion of the orientation of things, in relation to each. However, under conditions of hyperactivation such as in response to extreme fear it appears that the hippocampus may create a visual hallucination of that "cognitive map" such that the individual may "experience" themselves as outside their body, observing all that is occurring. MichaelJanuary14,atPMReply.Sortorder. If he goes up even higher, he will see his body getting smaller and smaller. Get to Know Us.

Theinformationyouenterwillappearinyoure-mailmessageandisnotretain are running way ahead. Let us remember that Tweedee has only notions of moving along length and width, but not at all in height.
